

## Gee Graphite Ltd

### Health and Safety Policy

Gee Graphite is committed to protecting the health and safety of all its employees and visitors to site together with interested parties in the vicinity of the premises. In order to achieve this we have adopted OH&S 18001 as the framework in which to operate. Hazards will be identified as part of this process and appropriate risk assessments carried out and those requiring control are recorded and actioned.

We are aware of the requirement to comply with the latest legislation and have appointed Stallard Kane to control our legislation register and advise us of any updates and their consequences. We understand the need to maintain safe and healthy working conditions, provide and maintain plant, equipment and machinery, and ensure safe storage and use of substances.

The system and policy is under the control of our QHSE Manager and will be monitored and reviewed on a regular basis and opportunities taken to continually improve our performance. Nominated staff shall be co-opted onto our Health and Safety committee, which meets on a regular basis to review the system and its implementation on site.

All employees are made aware of their responsibilities to the company, themselves and their colleagues; they are involved in developing the system as relevant to their area of work as required. Adequate training shall be provided in relation to safe working practices and occupational health
